FIRE AND CODE COMPLIANCE

Haven Lockdown is the only Active Shooter Access Control Safety Device that is fully fire and ADA compliant.

Key things to know:

1. Lockdown has been tested and certified to the UL10C, CAN/ULC-S104 fire standards and is fully compliant with required NFPA and IBC guidelines and code.

2. Lockdown complies with all egress requirements for 2015 Life Safety, IBC, and ADA requirements to present code standards:

>   A. One motion egress is accomplished by our hardwired hand activated motion sensor placed above the door knob.

>   B. The green egress button located next to the door knob is hardwired to directly unlock the device.

>   C. Lockdown can manually be activated and deactivated without special knowledge.

>   D. Can be controlled by smartphone or key switch from outside that room.

3. Certified to UL294 which requires 100K device cycles without a single failure.

4. Capable of hardwiring into fire system as an well as exterior keyswitch or Knox Box.

5. The Department of Homeland Security, as a result of these tests and certifications, has designated and certified lockdown to the rigorous Safety Act program standards for liability protection.

6. The Partner Alliance for Safer Schools has determined Lockdown meets access control standards, is not a barricade, and has listed Haven-Lock as an approved technology and partner (passk12.org).

Haven Team successfully passing the rigorous fire standards required for installation into commercial facilities.
