9.25" x 4.75" x 3.00"

### CAMERA BOLT HL1-CB-001

Body Diameter: 1.00"  
Flange Diameter: 1.40"

Body Length: 1.40"  
Body Length with Extension: 3.00"

Our 4th Generation Lock combines exceptional strength with cutting-edge technology, offering 2000 lbs of holding force in a compact design that's half the size of traditional locks and installs in just 30 minutes. It supports versatile connectivity options, including Power over Ethernet or low voltage power, and features an onboard battery backup.

Unlike magnetic locks or electric strikes, it includes a built-in Request to Exit (REX) sensor and provides both fail-safe and fail-secure options to ensure maximum fire and safety compliance.

Haven can be equipped with Locksight enabled onboard ONVIF-compatible interior cameras and the industry's first through-door camera technology. By seamlessly integrating with the Alarm.com platform, Haven provides a sophisticated, cost-effective solution for comprehensive security needs.

## KEY FEATURES

## BASE LOCK

Base locking system that includes local door protection and access control.

Ideal for:

- Schools
- Places of worship
- Safe rooms
- Low budget projects

**30 Min.**

INSTALL TIME

**2000 lbs.**
